# Klimate

Introduction & Description

What is Klimate?

Klimate is an interactive platform designed to empower individuals to take meaningful action against climate change by way of supporting sustainable businesses.

Klimate encourages community engagement and is dedicated to combating climate change and fostering a greener, more sustainable future, enabling individuals to make informed choices that align with their environmental values.

Users can explore sustainable businesses, write reviews and save favorites, add, update and remove businesses, view carbon offset projects and renewable energy initiatives, gauge their own carbon footprint, and view a comprehensive list of tips, guides and information regarding sustainability.
Core Features

1. **Entrance/ welcome page:** Explains the functionality and motivation of the website.

2. **Sustainable Businesses List Page:** Lists recycling centers, renewable energy installations, restaurants, and other sustainable businesses. Users can search for nearby locations and access detailed information including addresses, contact details, and user reviews.

3. **User profile page:** Allows a user to create an account. The profile will show the user's username, profile picture and date joined. A user account will allow users to write reviews and save their favorite sustainable businesses.

4. **Add, Update and Remove Sustainable Businesses Page:** Allows users to add and update the list of sustainable businesses. Users can also remove sustainable businesses that they have previously added.

5. **Carbon Offset Marketplace Page:** Allows users to offset their carbon footprint by supporting verified environmental projects such as reforestation or renewable energy initiatives.

6. **Carbon Footprint Tracker Page:** Users can calculate and track their carbon footprint based on numerous lifestyle factors such as transportation, energy consumption, and diet. This calculation will then be compared against a template which will give users a final "sustainability score."

7. **Tips and Guides Page:** The app/ website will offer tips, guides, and information to help users reduce their environmental impact. Topics include diet, waste reduction, sustainable transportation, and more.

Extra Features

1. ==Community Forum:== A dedicated space for users to connect, share experiences, and collaborate on environmental projects. Users can contribute to discussions and organize local events or initiatives to promote sustainability within their communities.

2. ==Climate Events List Page:== A comprehensive list of climate-related events, workshops, and community initiatives. Users can browse upcoming events, RSVP, and add events to their calendars. This feature will allow users to connect with like-minded individuals in their area.

3. ==Sustainable Product Promotion Page:== Businesses can promote their sustainable products. Users can review these products and determine what sustainable products are the best option for them and their families.
Who is our target audience?

Key Demographic:

- Our application is geared towards young adults, ages 18-35 years old, specifically those with a higher education level living in urban and suburban areas that have a focus on environmental awareness.

Target Segment:

- Eco-conscious consumers who recognize the value that sustainability has in their purchasing decisions.
- Individuals who are actively engaged in environmental activism and community building.
- Those who recognize the importance of environmental sustainability and social responsibility.
- Individuals who are under educated on their environmental impact.
Why is our application valuable to users?

- Klimate gives users the practical tools and resources needed to actively combat climate change and contribute to a more sustainable future.
- Our application facilitates connections among like-minded, environmentally-conscientious individuals, fostering a sense of community and mutual engagement.
- Users are able to visualize the effects of their actions, motivating them to strive for continuous improvement.
- It provides education on their personal impact at a larger scale, giving the continuous improvement a greater meaning.
Why is this project worth it?

This project is worth investing in because...

1. Promotes sustainable businesses
2. Promotes environmental awareness
3. Educates consumers about environmental impact
4. Reducing carbon footprint is crucial for the health of individuals and the world that we live in

Competition?

Rivalry among existing competition:

Klimate thrives among its over 100 climate application competitors, such as Earth Hero and Lemu, by continuously enhancing user experience, advancing strategic partnerships with sustainable businesses, and empowering individuals to take meaningful action against climate change.

Threat of new entrants:

Klimate is prepared to maintain its competitive edge through continuous innovation, and a strong emphasis on community engagement, making it difficult for new entrants to replicate our comprehensive approach and market presence.

Bargaining power of consumers:

Consumers' increasing demand for sustainable options is what empowers climate to attract and retain new users.

Threat of substitute products:

Our comprehensive approach, which includes community engagement and carbon offset initiatives, will mitigate the threat of substitute products.

Bargaining power of suppliers:

Klimate's emphasis on supporting sustainable businesses enhances its bargaining power with suppliers as businesses strive to align with the platform's objectives and gain visibility among consumers.

Why our application is better!

Our application provides a platform for businesses and consumers

- Connecting like-minded individuals
- Promoting sustainable businesses and products

Ease of use

- Navigate to tools, page of interest, and external links easily
- Search for businesses, products, and events of interest
